# DRIVE SAFE & SAVE

Thank you for enrolling in Drive Safe & Save Mobile.  
You are on your way to saving on your State Farm® auto  
insurance premium.

**LET'S GET STARTED!**

## NEXT STEPS FOR COMPLETING DRIVE SAFE & SAVE MOBILE APP SETUP:

1. Look for and download the Drive Safe & Save app on your smartphone. Visit the Google Play or the App Store from your phone. If you are able to download the app from there, your phone is eligible!
2. Once downloaded, tap on the icon and log in using your statefarm.com® user ID and password.
3. Place the Bluetooth beacon in your vehicle (this is shipped to you), and follow the setup instructions within the Drive Safe & Save app to connect the app to the beacon.
4. To maximize your discount opportunity, complete the steps above on each eligible phone for all drivers of the vehicle. Bring your phone on every trip and keep the phone's Bluetooth and GPS activated.
  - A trip automatically begins when you start driving, so there is no need to manually start or repeat app login.

It's that simple. You're on your way to a discount\* on your State Farm auto insurance premium.
