Join our community of good neighbors. Be a State Farm® intern.

IT/Systems – Security Analyst Intern

Program Overview

State Farm®, headquartered in Bloomington, Illinois, is offering hands-on analyst work along with real-world research and development opportunities for students. The Systems/Information Technology department is involved in exploring new and emerging technologies. State Farm continues to refine and expand the use of technology for employees, agents, and customers. Each summer, State Farm offers an 11-week paid internship at locations in Bloomington, Illinois; Atlanta, Georgia; Dallas, Texas; and Phoenix, Arizona.

Roles/Responsibilities

Security Analyst interns at State Farm design, implement, and maintain security infrastructure and systems that integrate capabilities and technologies to address identified risks and enable IT solutions. Security Analyst Internships are offered in **Information Security** and **Infrastructure Security**.
